

Saurabh Tiwari

Senior DevOps Engineer

Bengaluru, India | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Senior DevOps Engineer with 8+ years of experience delivering cloud, Kubernetes, and bare-metal platforms across global production environments. Specializes in CI/CD automation, FedRAMP/FIPS delivery, observability, infrastructure reliability, and production incident response.

TECHNICAL SKILLS

Cloud and Infrastructure: AWS, Amazon EKS, Kubernetes, Docker, Helm, Terraform, Bare Metal, PXE

Automation and Delivery: Jenkins, CI/CD, Ansible, Python, Bash, Shell, Go, Linux, Unix

Observability and Operations: Datadog, Grafana, Prometheus, Splunk, Nagios, CloudWatch, PagerDuty

Engineering: FedRAMP, FIPS 140-3, DevSecOps, incident response, root-cause analysis, SLOs

PROFESSIONAL EXPERIENCE

Senior DevOps Engineer 3 | Cisco | Nov 2024 - Present

Bengaluru, India | DevOps Engineer 2: Apr 2022 - Oct 2024

- Manage a global fleet of 62 bare-metal servers across development, pre-production, and production environments; provision hosts using PXE and Ansible, automate encrypted-disk secrets, validate Nagios, and move capacity into production rotation.
- Delivered IPv6 support for a regulated cloud platform through production by automating dual-stack NLB configuration and coordinating network dependencies, Jenkins changes, monitoring, and end-to-end validation.
- Led the migration of containerized edge services from Debian 11 to Debian 12 in a regulated environment, resolving FIPS build and test failures and coordinating change approval and production deployment.
- Built and maintained Jenkins pipelines for AWS secret automation and EKS infrastructure and service deployments, with CI/CD validation across regional and regulated environments.
- Executed staged production releases across 13 global data centers and coordinated certificate renewals for multiple proxy and security services and their supporting monitors.
- Improved reliability by migrating infrastructure and application dashboards to Grafana 9, integrating PagerDuty for on-call coverage, and stabilizing Datadog monitoring across development, pre-production, and production.
- Produced a FedRAMP cryptographic inventory and CBOM covering TLS, keys, certificates, Kubernetes Secrets, container signing, and FIPS 140-3 dependencies across cloud and edge services.

System Engineer / Site Reliability Engineer | Tata Consultancy Services | Jul 2021 - Mar 2022

Mumbai, India

- Managed AWS infrastructure and application deployments using Terraform.
- Built CI/CD automation and supported automated testing, unit testing, and code coverage practices.
- Configured Splunk and AppDynamics alerts, investigated server overloads, and resolved or escalated incidents within SLA.
- Administered Jenkins dashboards for multiple teams, performed upgrades, and supported Linux and certificate maintenance.

Assistant System Engineer | Tata Consultancy Services | Jan 2019 - Jul 2021

Mumbai, India

- Worked with cross-functional teams to design cloud-native enterprise architectures aligned with technical and business requirements.
- Provided production systems support, resolved customer and service incidents, and contributed to operational reliability improvements.

EDUCATION

Master of Computer Applications | Sastra Deemed University | 2018 - 2022 | 7 CGPA

Bachelor of Computer Applications | BBD University | 2015 - 2018 | 8 CGPA

CREDENTIALS AND ADDITIONAL INFORMATION

Credential: Cisco AI Technical Practitioner | **Languages:** English, Hindi | **Community:** CSR Volunteer at Cisco
